Education

MGM Dr.G.Y.Pathrikar College

Bachelor of Science in Computer Science

June. 2019 – Nov 2024

Aurangabad, Maharashtra

Internships

Global IT Provider

June 2024 – december 2024

DevOps Intern

Aurangabad, Maharashtra

- Designed and implemented a system to collect server data and logs through a Jenkins pipeline, integrating seamlessly with Flask and Django web applications.
- Posted collected data onto a user-friendly website using Flask/Django, providing stakeholders with real-time system insights.
- Enabled real-time posting and visualization of server logs through a web-based dashboard.

Vitel Global pvt ltd

March 2025 – june 2025

DevOps Intern

Hyderabad, telangana

- Collaborated with development teams to optimize application performance and managed Git repositories as the source code management tool, handling 50+ commits, clones, and pull requests.
- Employed Docker for containerization to improve system reliability and scalability; gained hands-on experience using Terraform to write Infrastructure as Code (IaC) for automating infrastructure provisioning.
- Analyzed over 1,000 system logs daily and monitored activity using Splunk, reducing incident response time by 30% through automated threshold-based notifications.

Projects

Automated CI/CD Deployment of Bharat Payroll on Dockerized Infrastructure using Jenkins and Nexus

- Designed and deployed a full-stack containerized payroll application using Docker, consisting of a PostgreSQL database, Django backend, and React frontend. Used docker-compose for multi-container orchestration and environment consistency.
- Utilized AWS EC2 for hosting Kubernetes clusters; used Kubernetes Dashboard for a visual interface to manage containerized applications.
- Implemented Argo CD as a Continuous Delivery tool for automated deployments, increasing efficiency by 60% and ensuring consistent updates.
- Achieved 99.9% uptime and seamless application scaling through effective monitoring and infrastructure management.

CI/CD Pipeline for Java Application Deployment on Kubernetes Cluster using Jenkins

- Integrated Jenkins and SonarQube for automated static code analysis and quality checks.
- Containerized the Java application using Docker and pushed images to a private registry.
- Detected and corrected misconfigurations in Helm charts using Datree; pushed reusable Helm charts to Nexus repository.
- Deployed the application on a Kubernetes cluster using Helm; configured mail server notifications and enabled pull request triggers.

Technical Skills

Languages: Python, SQL, Shell Scripting, Bash, Groovy

Cloud Technologies: AWS (EC2, S3, DynamoDB, RDS, Route 53, Lambda)

Technologies/Frameworks: Linux (Ubuntu, RedHat, CentOS), Jenkins, GitLab, GitHub, Kubernetes, Terraform, Cloud Computing

Software/Tools: Docker, EKS, Grafana, MySQL, Visual Studio Code

Certifications

AWS Certified Solutions Architect – Associate

Valid Until 2027
